KEY DEFINITIONS

- **Deductible**: The amount you pay each benefit year for covered services before coinsurance kicks in.
- **Out-of-Pocket Maximum**: The most you'll ever be required to pay for covered services in a benefit year.
- **Copay**: Your fixed payment at the time of service. Copays still apply after your deductible is met
- **In-Network Provider**: Providers within the network shown on your ID Card. Always confirm status before scheduling care.

GLP-1 Receptor Agonist Coverage Rider

The Plan covers GLP-1 receptor agonist medications — including but not limited to semaglutide, tirzepatide, and liraglutide, and other formulations approved by the Plan's Pharmacy & Therapeutics guidelines — when prescribed by a licensed provider for an indication supported by the Plan's formulary criteria and/or medical necessity documentation.

Member Cost-Sharing

Members are responsible for the following copayment amounts per fill, up to the supply limit stated below, when obtained through an in-network pharmacy:

Product Type	Member Copay (Per Fill)
Brand-Name GLP-1 Medication *FDA-approved, manufactured product*	**$550**
Compounded GLP-1 Medication *Elected by Member as an alternative to the brand-name product*	**$200**

Supply limit: up to a [30 / 90]-day supply per fill. Copays listed above apply to in-network pharmacy fills only; out-of-network fills are subject to the Plan's standard out-of-network prescription drug provisions. These copay amounts apply regardless of the Plan's general formulary tier structure and supersede any conflicting standard prescription drug copay schedule with respect to GLP-1 receptor agonist products specifically.

Conditions of Coverage for Compounded GLP-1 Alternatives

Compounded GLP-1 Coverage ($200 Tier) — Conditions

To qualify for the $200 cost-share tier, a compounded GLP-1 medication must meet all of the following:

1. ***Pharmacy source.*** *The medication must be dispensed by a state-licensed 503A compounding pharmacy or 503B outsourcing facility that is in good standing.*
2. ***Regulatory status.*** *Coverage depends on current FDA guidance and the drug shortage status of the active ingredient(s) used. If compounding that ingredient is no longer legally permitted, the Plan may modify, limit, or end this coverage tier.*
3. ***Member acknowledgment.*** *The Member must sign a Plan-approved form confirming they understand the compounded product is not FDA-approved and has not been evaluated by the FDA for safety or effectiveness.*
4. ***Prior authorization.*** *Prior authorization may be required to confirm the treatment is clinically appropriate and to document that the Member is choosing the compounded alternative instead of the brand-name product.*
5. ***Matching indication.*** *The compounded product must be prescribed for the same indication that would otherwise qualify the brand-name GLP-1 product for coverage under this Rider.*

This is just a brief overview of this rider, please see your full plan document for all details.
